Release v1.2.2

DuckX is a C++ library for creating and editing Microsoft Word (.docx) files.

CHAPTER 1

How to install

The instructions to install DuckX

```
git clone https://github.com/amiremohamadi/DuckX.git
cd DuckX
mkdir build
cd build
cmake ..
cmake --build .
```

CHAPTER 2

Quickstart

How to start with the DuckX quickly

```
#include <iostream>
#include <duckx/duckx.hpp>

int main() {

    duckx::Document doc("file.docx");
    doc.open();

    for (auto p : doc.paragraphs())
        for (auto r : p.runs())
            std::cout << r.get_text() << std::endl;

    return 0;
}
```
